Medical Care Units

The world's healthcare infrastructure is under extreme pressure and load to meet the growing threat of Covid19. Here at modDsys, we are ready to step up to the challenge and do our part. We have developed a range of medical units to be used for testing, quarantine, medical procedures, welfare and other public health care needs. These units have been designed and developed with a focus on short production times, to allow for rapid deployment. During these unknown times the world needs to come together to solve this.

Modular ICU Unit

Bathrooms / Showers

Medical Care Units

Utilising standard 20ft and 40ft containers we have produced twenty one units designed to meet a range of challenges in the current climate.

Module Unit Design

- Examination Room
- Four Bed Unit
- Restroom
- Showers
- Eight Bed Unit
- Conference Room
- Drive Thru Test Unit
- Medical Testing Unit
- Morgue
- Staff Lounge
- Waiting Room
- Office
- Storage
- Telecomm Room

Drive Thru Testing

Medical Care Units

Here at modDsys we are aware that time is not a luxury the world has at the moment. With more lives continually at stake every passing day production, transport and deployment speeds are of the utmost importance. That is why we have chosen to use shipping containers as a base unit from this we can modify and ship hundreds per day.

Build Speed: Through the use of containers and our innovative production facility we can quickly scale and meet demand

Reduced cost: Utilising prefabrication techniques and economies of scale allow for costs to be heavily reduced

Quick Deployment: Units require minimal setup and can be deployed in 30 mins

Flexibility: All units are portable and can be easily moved to different locations or alternating layouts. Units can be stacked and stored for future use

Logistics: With units sizing meeting global standards, units can easily be transported via roads with minimal to no disruption
